PROFESSIONAL SUMMARY

Investment research professional with 2+ years of hands-on experience in DeFi protocols, blockchain infrastructure, and quantitative strategy development. Proven track record of building high-performing algo communities and rigorous pre-investment stress-testing frameworks in fast-moving Web3 environments. Seeking an investment research or DeFi analysis role where deep protocol knowledge and data-driven decision-making drive alpha.

EXPERIENCE

Product Research Analyst | Infrasingularity — Remote

Jun 2025 – Feb 2026

- Built and maintained end-to-end evaluation pipelines to identify, score, and prioritize infrastructure-running opportunities across 15+ protocols per quarter.
- Conducted deep-dive due diligence on DeFi and Web3 protocols, assessing tokenomics, risk parameters, and strategic fit for infrastructure deployment.
- Collaborated cross-functionally with protocol teams to align infrastructure initiatives with strategic objectives, accelerating partnership timelines by ~30%.
- Produced structured research reports that informed go/no-go investment decisions on node operation and validator opportunities.

Research Analyst | Zelta Tech — Jaipur, Rajasthan

Mar 2024 – Jun 2025

- Designed and deployed a stress-testing engine for quantitative algorithms, validating performance across 20+ adverse market scenarios before any live capital exposure.
- Founded and scaled a community of 900+ quantitative analysts, fostering knowledge-sharing that produced **6 benchmark-beating algorithms** (Sharpe ratio > 6) within 6 months.
- Contributed to the development of an internal algorithm creation and back-testing platform, reducing strategy validation time by an estimated 40%.
- Evaluated algorithm robustness across bull, bear, and high-volatility regimes, ensuring consistent risk-adjusted returns before production deployment.

SKILLS

Technical: DeFi Protocols, Blockchain Technology, Smart Contract Analysis, Quantitative Research, Algorithm Development, Stress Testing, Risk Modeling, Data Analysis

Domain: Web3 Investment Research, Tokenomics Evaluation, Node/Validator Operations, Trading Strategies, Risk Management, Community Building

Soft Skills: Analytical Thinking, Cross-functional Collaboration, Written & Verbal Communication, Problem-Solving

EDUCATION

B.Tech in Computer Science Engineering — Specialisation in Blockchain Technology

Graduated 2024

SRM University, Chennai | Coursework: Blockchain Development, Financial Markets, Decentralized Systems, Data Analysis

KEY PROJECTS

Pre-Investment Stress-Testing Engine — Zelta Tech

- Architected a simulation framework that subjected trading algorithms to 20+ synthetic market stress scenarios; results directly prevented deployment of 3 under-performing strategies.

Quantitative Analyst Community — Zelta Tech

- Grew a quant community from 0 to 900+ members in under 12 months; structured weekly algorithm challenges that yielded 6 live strategies with Sharpe ratios exceeding 6.0.

ADDITIONAL

- 5+ years of active cryptocurrency trading across spot and derivatives markets; developed a systematic understanding of market microstructure, sentiment analysis, and risk management.
- Regular contributor to Web3 research forums and DeFi communities, focused on DeFi adoption and infrastructure education.
